## GROWTH OF KOITIATA

---

A good number of people are living at the beach. The new township there has received the name of Koitiata. A road has been formed, several cottages erected, and others are living in tents. The beach is exposed, bare and sandy, yet seems popular with those who love to be near the sea.

Turakina Notes

(From our Own Correspondent).

Koitiata, the popular seaside resort at the mouth of Turakina River, has been well patronised of late. The fishing has not been all that could be desired, which is probably due to the windy weather experienced.

## SECTIONS AT KOITIATA

---

The annual report of the Kotiata Domain Board, which controls the Turakina seaside township, shows that eleven sections have been disposed of at from £1 to £1 4s 6d per annum, and it is anticipated that the remainder of the sections will soon be disposed of. It is hoped to secure a further improvement of the road leading to the Domain, and the Board recommended that a commencement be made with the planting of trees.
